However, Quicktime has long been considered an excellent media player for Windows as well.. dr fone is intuitive with a gorgeous interface and the best part about this app is just how easy it is to use.. That is because it is designed to work exclusively with Mac OS, and so will not run on the Windows operating system.. #2 Sharepod Sharepod is an excellent little software that is actually very efficient at keeping a log of the files that you were transferring and accomplishing the transferring process in an efficient manner.. Every activity in this app involves simply basic logic to accomplish There are no unnecessary complications that you have to work through.. It keeps a backup of your files on your computer and even syncs with iTunes automatically! Sharepod has a lot of functionality as well, allowing you to create playlists and save artwork as well.. However, if your Mac runs on Windows you will notice that Senuti will not work on your computer.. So much functionality is also coupled with the fact that its interface is really very good comes together to make Sharepod one of the best software programs of its kind out there.. Hence, if you are using a Mac with the brand new Windows 10 you will be unable to use this software. e828bfe731 [World Groove Trf Rar](#)
